Python & Jupyter Notebook Installation - Quick Guide

Step 1: Download Python

- Go to <https://www.python.org/downloads/>
- Click **Download Python 3.12** (latest version)
- Save the installer file

Step 2: Create Folder in C Drive

- Open **Command Prompt** (Win + R, type cmd, press Enter)
- Type this command: md C:\ MyPython
- This creates a folder named "MyPython" in C drive

Step 3: Install Python

- Run the downloaded Python installer
- **IMPORTANT:** Check ✓ **"Add Python to PATH"**
- Click **"Customize installation"**
- In next screen, change path to: C:\ MyPython
- Click **Install**

Step 4: Verify Python Installation

- Open **Command Prompt**
- Type: python --version
- If version shows (like 3.12.x), installation is successful

Step 5: Install Jupyter Notebook

- Open **Command Prompt**
- Type this command: pip install jupyter
- Wait for installation to complete

Step 6: Launch Jupyter Notebook

- Open **Command Prompt**
- Type: jupyter notebook
- Browser will open automatically
- Start coding!

OUR LOCATIONS

If Error Occurs

Problem	Solution
python command not found	Reinstall and check "Add Python to PATH"
pip not working	Try python -m pip install jupyter
Port already in use	Type jupyter notebook --port=8889

Table 1: Common Problems and Solutions

Total Time: 10-15 minutes
